

Date:

Wednesday Challenge Form

Group Members: Justin, Cole, Alex

Problem Statement: We had to design an E in sketchup then give it to another group and they have to build it.

Approach: Our Approach was to make a simple design that could be easily made and fit in the room. This way we would have a higher likely hood of winning. Winning is GOOD!

Solution: We used this design and I think it worked.

Lessons Learned: Good communication, and simplicity of design is key to winning.
