

Date:

Wednesday Challenge Form

Group Members: Eric, Alex, Sebouh, Cole

Problem Statement: As we are prepparing for the FRC competition the wedchall was to quickly learn the rules and then score a Match.

Approach: My approach was to explain some of the things we had discussed in Robotics so that they would understand some of the more controversial things in the rule. I showed them the score grid on the rules. The only one from my group paying attention was Sebouh.

Solution: My solution was to lead them to the information however this did not work.

Lessons Learned: Next time I will demand attention or at least try because if they had payed attention they would've won.
