## Wednesday Challenge Form

Group Members: The whole class

Problem Statement: Build a thing having one person blind folded and another giving them Commands. Everyone is in a pair of two.

Approach: My approach was to take control of the situation and give every team something Specific to do so that we can optimize our time And work as coordinated unit.This worked Well and we ended up winning.

Solution: Coordinate the build with all the groups to work quickly and efficiently

Lessons Learned: Communication is Key.
