

Wednesday Challenge Form

Group Members: whole class

Problem Statement: Assemble a structure with your partner and other class members. One person blind folded and the other is commanding.

Approach: We lined up the whole class with their partners and then tried to minimize time between groups by pre explaining goals for each pair to complete.

Solution: We lost. 42 to 36 minutes.

Lessons Learned: I think it would be better to tell people we are getting sugar so there is more motivation
