

Date:

Wednesday Challenge Form

Group Members: Keilah, Kevin, And Alvin

Problem Statement: Fix neatos door so it dosnt suck anymore.

Approach: Make a loop thing that keeps the doors together like this.

Solution: This is within easy reach of neato when he comes in in the morning and for Ms. M.

Lessons Learned: Make things robustly so that 30 years later a class of high schoolers don't have to fix your work.
