

Date:

Wednesday Challenge Form

Group Members: Half the Class

Problem Statement: Pass the tubes around by throwing them and catching them with one hand. Increasing the level of difficulty each time.

Approach: Practice the first difficulty lvl and once that's done move on to lvl 3 that way we get the most practice with the hardest one.

Solution: We ended up achieving the 2nd lvl but no further.

Lessons Learned: Communication is hard and you have to work with what you get.
