

Date:

Wednesday Challenge Form

Group Members: Elisabeth, Lucas, Evan, Cole

Problem Statement: We had to make a CAD of an A and send it to another group. Then we build an A someone sent to us.

Approach: We tried to make it simple to make but then I was absent so I didn't do anymore work on it cause I was gone for a week.

Solution: Armin switched to another group to finish the project

Lessons Learned: Show up to school so you can participate
